## DETAILED ACTION

### *Abstract*

1. The abstract is objected to because it fails to give necessary technical disclosure gist. **See 37 CFR 1.72. MPEP 608.01(b) is recited below:**

(b) A brief abstract of the technical disclosure in the specification must commence on a separate sheet, preferably following the claims, under the heading "Abstract " or "Abstract of the Disclosure. "The abstract in an application filed under 35 U.S.C. 111 may not exceed 150 words in length. The purpose of the abstract is to enable the United States Patent and Trademark Office and the public generally to determine quickly from a cursory inspection the nature and gist of the technical disclosure. The abstract will not be used for interpreting the scope of the claims.

### ***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office Action:

A person shall be entitled to a patent unless --

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

3. Claims 1-3, 6-14 are rejected under 35 U.S.C. 102(e) as being anticipated by Teng et al. (US Patent 6,094,679).

Teng anticipated independent claims 1 and 12 by the following:

"a system manager for collecting attribute data... " at Fig. 1, col. 6, line 52-55;

"a user interface connected to the system... " at Fig. 1, col. 5, line 63-66.

4. As per claims 2, 8, 13 and 14, "memory for storing attribute data... ", at Fig. 1, col. 5, line 25-40.

5. Teng also anticipated the independent claim 3 by the following:

"polling at least two platforms... " at Fig. 5, col. 7, line 53-67 to col. 8, line 1;

"collecting the attribute data... " at Fig. 5, col. 8, line 1-6;

"displaying the collected attribute data... " at Fig. 6, Col. 8, line 32-35.

6. As per claims 6 and 7, "the step of collecting copyright information... " at Fig. 5, col. 8, line 5-12.

7. As per claims 9, 10 and 11, "automatically displaying the attribute... " at Fig. 8, col. 9, line 49-67 to col. 10, line 1-28.

### ***Claim Rejections - 35 USC § 103***

8. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

"A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the

subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made."

9. Claims 4, 5 rejected under 35 U.S.C. 103(a) as being unpatentable over Teng et al. (US Patent 6,094,679) as applied to claims above, and further in view of Menezes et al. (US Patent 5,621,894).

Teng does not teach explicitly polling other platform. However, Menezes teaches poling other computers/Fax machines. (col. 17, line 55-67 to col. 20, line 23-39). Thus, it would have been obvious to one ordinarily skilled in the art at the time of the invention decide to use polling other platforms/devices in the network to collect and consolidate the information in order to respond to the queried platform/device.

### ***Conclusion***

- 10 Any inquiry concerning this communication or earlier communications from the examiner should be directed to Sathyanarayan Pannala whose telephone number is (703) 305-3390. The examiner can normally be reached on 8:00 am - 5:00 pm.
